AI-Driven Data Protection for the Modern Digital Workplace

Dathena's AI-powered sensitive data discovery and protection platform enables industry-best protection of your personal and business critical data to help you easily mitigate the risk of data breaches and meet compliance requirements

Our Mission is to Build
Trust in the Digital World

About Us

Dathena is a deep-tech company that brings a new paradigm to data privacy and security solutions. In a world of ever-growing information, regulation, and consumer privacy expectations, enterprises from all industries rely on Dathena to identify, classify and protect sensitive data.

Leveraging the power of modern AI technologies, Dathena delivers breakthrough, petabyte-scale solutions with unprecedented accuracy, efficiency and speed that build consumer trust in a digital world and ensure the "privacy and data security protection journey."

Founded in 2016, Dathena continues to grow with offices in Singapore, France and Switzerland, Dathena employs the world's top data scientists and information risk experts.
